

COMMANDER PHONE

IP Phone T54W

User Guide

Packaging Contents

The following items are included in your package. If you find anything missing, contact your system administrator.

IP Phone

Handset

Stand

**Power
Adapter**

Ethernet Cable

Handset Cord

Assembling the Phone

1. Attach the stand

Attach the stand and adjust the angle of the screen

2. Connect handset to phone

- i. Connect one end of handset cord to handset
- ii. Connect unattached end to back of phone marked with  symbol

Connecting the Phone

1. Connect to power

Connect the handset using the supplied power adaptor to the port marked on the back of the phone.

2. Connect to internet

Hardwired

Connect the supplied Ethernet cable to the port on the back of the phone marked Internet. Plug the other end into a spare LAN port on your modem or live ethernet port at your desk.

Wi-Fi

- Press Menu->Settings->Basic Settings->Wi-Fi
- Highlight the network you wish to connect to and select Enter
- Enter the Wi-Fi password to join the network
- If network doesn't show automatically select Scan

We recommend hardwired, Wi-Fi signal may have interference and impact voice quality.

Startup

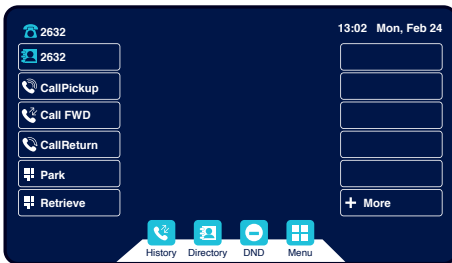

After the IP phone is connected to the internet and power it automatically begins setup, updates and configuration.

The phone may reboot multiple times so please allow up to 10 minutes for this to happen. The screen will indicate the status.

Do not unplug the power or ethernet cable until you see the “home screen”. This could cause the phone to lock up and require a reset.

Once Configuration is complete your phone is ready for use and will look similar to the picture below (home screen).

If you require assistance, please call the Commander Phone team on **1300 638 208**, or email us at onboarding@commander.com

The first time you access Contact Directory or Call History you may be prompted to enter your Command Central password.

This password is available from your site administrator, or via the email sent to you titled Commander Phone Administrator details.

CREATE A CONFERENCE CALL

To create a Conference call

- Press the **Conference** key during an active call
- Enter the extension or external number of the second party, then press the **Send** key
- Press the **Conference** key again when the second party answers. All parties are now joined in the conference

CHECK WI-FI SIGNAL

If you are experiencing voice quality issues, we recommend checking your Wi-Fi signal.

- Select Menu ->Setting -> Basic Setting ->Wi-Fi -> Wi-Fi status
- Look at the signal strength, if low (<2) please consider relocating the handset.

Please note, the environment and location of Wi-Fi modem/mesh device can cause poor call quality and affect call reliability
